i love this camo

my favorite camo of all time

. Spooky, MOMO's scream scared me so much XD. Charming little game. A puzzle/platformer with time travel dynamic and cute characters. Doesn't take long to beat, so 5€ is probably a little much, but definitely worth picking up if it's on sale!.

10 Second Ninja X is hardcore speedrunning game. You've got ten seconds to destroy all robots on a short level. At each level you have 3 Throwing Shurikens and Sword to use.

Game is easy to learn, hard to master. It's not difficult to complete level in 10 second, it's difficult complete level with 3 stars, you have to be really fast. I like this game a lot and I had a great time to playing this game. I got world record on one level unexpectedly and i was super happy about that. and now 17 hours later i got all achievements. :)

10/10 love this game Woouooooooooah - livin' on a prayer . Great costume for Tamamo lovers, which resembles her looks of lancer class version in FateV/Grand Order.

Lacusta Passage is an upcoming first person survival game which takes place on the planet Mars and is being developed and published by Random Seed Games. The 25 square mile map was generated using real data collected by HiRISE (High Resolution Imaging Science Experiment) and photos from real-life rover missions. The developers were inspired by NASA's Curiosity rover landing to develop the game.

It's rare to find a survival game, where the only enemies are the elements. In Lacusta Passage while your EVA suit is on, you'll have to worry about Oxygen & Power levels. Currently these can be replenished by entering a habitat that is powered. You also have hydration and nutritional needs. These can be replenished with snacks, meals, and water. The catch is, you have to find a powered habitat to take your helmet off to consume/drink.

As I'm writing this, story mode is not available. However I'm excited to say the main protagonist will be female; Another rare but appreciated aspect of this game. Players will assume the life of Jessica Rainer as the only survivor of the first manned Mars mission. As you can imagine, she's going to Matt Damon the crap out of this.

I also felt it necessary to point out how beautiful this game looks. Players will look towards the Martian horizon and see the crimson rust mountains, covered by orange-blue skies. You'll get to see our sun, from another atmosphere. It's even more satisfying to see human-made buildings and gadgets populate the surface. It's capturing my imagination into what I hope becomes a reality.

The game also is very realistic and allows the player to discover how to play the game without forcing it down their throat. There will be a few pop-ups about how to use the very basic controls of the game, but past that, it's all up to you to discover how to do things by trial and error. I've learned for example, don't change fuses in a fuse box, while the power is still on.

Usually Early Access games can be a mess, and the lasting wish I'm left with, is that they'd do bug fixing. That's not the case with Lacusta Passage. Instead I'm left wondering what cool features and systems are they going to develop? I'm hoping for a broad cultivation system to grow your own crops. I'm obsessed with farming simulators, and I'd love to have a garden on mars! *Spoiler* I was teased with a gorgeous looking land vehicle that is currently inoperable. I can't wait to see the different ways players are able to travel on the red surface. I'd love to see if they approach multiplayer, but I can also see this being a great solo-only experience. Also, this game would be super rad in VR! Could we expect that? I really hope so. I'm rooting for Random Seed Games and you should too!. This game isn't going to blow your mind and change your life, but what it does it does well. The combat is decent for a jrpg type game (and has actually provide a pretty good challenge). The story is pretty good so far, mostly serious with some dry bits of humor that is done pretty well. Character building\character progression is lite, but different. I have been enjoying the setting. Characters are good so far. I actually have been reading and paying attention to the story and what people say or what is written in journals, etc, I pick up.

The bottom line - is this game worth \$3 (or \$2.50 currently on sale)? Yes, definitely. This game has more going for it than a lot of the generic jrpgs\vrpg maker games that come out and sell for \$15 or \$20. I've already have gotten \$3 out of it, and I feel safe recommending it to people who can tolerate the graphics.

The cons, to me, are-

Controls, I can't rebind keys

Like most of these games the controller UI is awful on a civilized keyboard and mouse set-up and having to navigate the UI to do something simple is a huge pain in the\u2665\u2665\u2665\u2665\u2665(which is true for every game like this, from FF7 to Skyrim).

Thats about it, but for a pretty decent game at full price \$3 I can't complain.. Still enjoying the game after a couple of years. Absolutely worth your money!. Awsome game. I lke games like these.. Well I didn't know this one of the dreamcast title well I love shoot an up 1st got look at it on XBOX one i just had to have it then saw PS4 grab it without thought played it like the raiden franchise only collect a lot i thinks it gold following powers up no what difficulty u set it on it still hard I'm hopping getting the physical copies soon worth game of the year. Small Radios Big Televisions has a title which basically says nothing at all about the actual game. It is an unique blend between a point and click adventure, a puzzle game, walking simulator, partially rotatable levels like in FEZ a physics simulation and a quite mysterious indie title, story wise.

The main selling point here is "unique", as the gameplay itself is rather simple, but the combination of elements, blended in a

way never seen like this before, makes this an actual fun journey. The level designs are nice (and sometimes confusing), the collectible tapes are interesting, the magnetic reshuffling mechanic of found tapes is downright brilliant and the different worlds all have a touch of their own. All in all it's a rather short experience of a few hours with zero replayability whatsoever and I'd wait for a sale to pick it up, but it does very well as a little gap filler for a long evening or a not too challenging yet interesting game to wind down.. Really well made space simulation. Trade, Transport, Research are all up for grabs. Incredible flight controls, manual docking is a real treat too.

8\\10. Great rogue-like! I've been waiting for a top-down Rogue Legacy for some time and this game provides. Fun Diablo-like hack&slash combat, easy to learn, and quite polished for an early access game.. I recommend this just for the achievements.. Brothers in Arms : Earned in Blood is part of the Brothers in Arms series. It's history mode is very realistic because of the fact that it explains a real history, not the WWII history but the one of a group of soldiers that actually existed.

GAME MODES:

History: as I explained earlier it is real, real characters and maps. You play as a United States of America soldier. You can choose difficulty between: Easy, Normal, Difficult or Realist. You can only play realist if you already completed this mode in difficult. I recommend to start with normal because easy is too easy to be entertaining.

Skirmish: You choose map, character, difficulty and everything. In this mode the characters aren't real anymore. The interesting thing here is that you can choose between faction, USA or Axis.

Graphics: they are not the best graphics ever but not bad, anyway you can change them.

Guns: really realist, they sound as they sounded in real life.

This game can offer you hours of playing without boaring.
